Harbour, NSW

## **SPECIAL XMAS AIR TRACK PROMOTION!**

After considerable demand and just in time for the festive season we are really pleased to announce the release of a limited edition, specially priced training Air Track for the house or home gym. Quite possibly a fabulous gift idea!

These Air Tracks will be 150mm in thickness x 1m in width x 4m in length, they are being manufactured in yellow DWF (double wall fabric) and they will come with a foot pump included in the package. Suitable for most ages and for perfecting that new move!

Competitively priced at \$850 + GST and domestic freight, limited stock will be ready for dispatch from our warehouse in late November and we are now taking orders, so if you're interested let us know and secure yours at [info@airmat.com.au](mailto:info@airmat.com.au)

Remember the pressure in your inflated Air Track can be slightly varied, which will then offer different levels of resistance and spring which in turn can accommodate performers of different ages, working on a variety of routines.

At 1m wide don't forget your fall zones, always take care to ensure appropriate safety measures and protections are in place and that enough space has been allowed to perfect your performance! These rules should apply to all Air Tracks!

If you need any more information on this new addition to our range please get in touch.

## LOGOS

We were recently asked about including a Gymnasium Logo in the middle of a large performance track for one of our clients. Whilst this is a possibility, it must be pointed out that there are a couple of considerations to bear in mind before placing an order. Single plate printing for artwork production is quite expensive and whatever the attached logo is made from, if it is in the centre of the Air Track, it will eventually wear with the constant use and this could affect the surface grip.

*A few reminders from our last Newsletter:*

## COLOURS OF OUR PRODUCTS

Whilst choice is somewhat limited by the colour that the raw materials for our tracks is manufactured in we have endeavoured to streamline the process and our colour range is now governed by the thickness of the finished Air Track:

All 200mm mats and tracks are in customers' choice of red or blue, whilst 150mm and 300mm thicknesses are made in yellow. Anything under 150mm will be delivered in red.

## DELIVERY PROCESSES AND TIMEFRAMES

Given the majority of our Air Tracks, Air Mats and Air Floors are manufactured to order in our factory, getting them made and delivered to you can take a few weeks. Usually 21-28 days.

We do offer express air courier, regular courier and even standard delivery options for your purchase so if there is a need to have your new Air Mat delivered in time for an event or a special occasion then this is possible.

Please ask at the time of ordering to see if different delivery options are available for your area.

## INDIVIDUAL WORK OUT MATS STOCK CLEARANCE

If you're looking for an air-sprung work out at home then our individual DWF exercise mats could be just the solution! 2m long by 650mm wide by 70mm thick there's plenty of space to complete most aerobic routines and what's more they're light weight and easy to pop in the car to take to the gym if need be. A lightweight foot pump (not included) will have you inflated and exercising in no time. The DWF construction of the mat will be easy on the back and lower limbs and provide much more spring than a standard foam or rubber exercise mat.

Usually retailing for \$250 + GST & Freight these are now just \$199 + GST.

We still have one or two of these left. To get yours: [info@airmat.com.au](mailto:info@airmat.com.au)

*Send us your Air Track photos and we'll include them in our next Air Mat Newsletter*
